EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with David Boutell on 1/5/04.

The application has been amended as follows:

In the abstract:

Line 1, delete "To provide an" and replace with --An--.

Line 10, delete "the gasket" and replace with --a bight section--.

In the specification:

Paragraph [0004], line 9, after "In", add --the--.

Paragraph [0004], line 10, change "leak" to --leakage--.

Paragraph [0005], line 2, delete "embodiment" and replace with --example--.

Paragraph [0006], line 3, delete "it" and replace with --the gasket--.

Paragraph [0009], line 10, replace "sealing" and replace with --seal--.

Paragraph [0010], line 3, replace "sealing" and replace with --seal--.

Paragraph [0013], line 8, after "opponent", add --or opposing--.

Paragraph [0031], line 3, delete "with" and add --having two legs interconnected by a bight section and having--.

Art Unit: 3676

Paragraph [0031], line 3, after “opening”, add “--between the legs--”.

Paragraph [0039], line 6, replace “a central” by “--the bight section having a central--”.

Paragraph [0040], line 7, replace “a central” by “--the bight section having a central--”.

Paragraph [0041], line 7, replace “a central” by “--the bight section having a central--”.

Paragraph [0042], line 7, replace “a central” by “--the bight section having a central--”.

Paragraph [0043], line 7, replace “a central” by “--the bight section having a central--”.

Paragraph [0044], line 8, replace “a central” by “--the bight section having a central--”.

In the claims:

1. (Amended) An annular-shaped gasket having ~~a cross section provided with an outer circumferential opening and formed in~~ one of a laterally opening U-shape and a C-shape formed by two legs separated by an outer circumferential opening and interconnecting bight section, comprising annular-shaped voids formed in the innermost circumferential portions on the two confronting flat sealing surfaces of the metal gasket that are in contact with ~~opponent~~ opposing surfaces, each void having a width equal to or more than 40% of ~~the~~ a central wall thickness t_0 of the ~~gasket~~ bight section and a height equal to or more than 5% of the height H of the gasket, wherein the cross section of the gasket is formed in a tuning-fork shape.

2. (Amended) A metal gasket according to claim 1, wherein ~~the~~ a wall thickness t_1 of the ~~portions~~ legs of the metal gasket that are caused to come into contact with the ~~opponent~~ opposing surfaces ~~by tightening is~~ are gradually reduced to 50% of the wall thickness t_1 toward the circumferentially outermost portions of the legs of the metal gasket.

Art Unit: 3676

2. The following is an examiner's statement of reasons for allowance: Prior art (Luthe or Chevallier) teach an annular-shaped gasket having one of a laterally opening U-shape or C-shape formed by two legs separated by an outer circumferential opening and interconnecting bight section but fail to teach or fairly suggest annular-shaped voids formed in the innermost circumferential portions on the two confronting flat sealing surfaces of the metal gasket that are in contact with opposing surfaces, each void having a width equal to or more than 40% of a central wall thickness t_0 of the bight section and a height equal to or more than 5% of the height H of the gasket, wherein the cross section of the gasket is formed in a tuning-fork shape. Furthermore, the metal gaskets according to the present invention can reduce a tightening force necessary to form sealing by forming the cross sections of the gaskets in the tuning-fork shape and providing the voids with the surfaces thereof in contact with opposing surfaces.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. TRBOVICH, JOHNSON et al., WEITZEL, Rode, Luthe, Chevallier et al., Nicholson, Ma et al., Doyle, Spence et al. and Shibata et al.
